

How your guests access EV chargers

Drivers will need to be well versed in the details of EV charger activation. Below is a useful guide about how drivers will access the EV chargers on your property.

Charger ID and QR Code

TurnOnGreen EV chargers are labeled with an identification alpha numeric code, as well as a QR code for access.

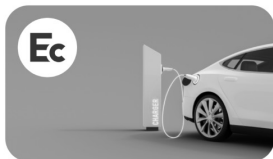

The guest will scan the QR code on the charger, and will be taken to a web page for activation- no app required.

Plug into vehicle

TurnOnGreen EV chargers are labeled with an identification alpha numeric code, as well as a QR code for access.

The guest will scan the QR code on the charger, and will be taken to a web page for activation- no app required.

Charging session details:

Price	\$3.00/kWh
Activation fee	\$0.20
Parking fee	\$2.00/h
Grace period	10 m

Please enter your email if you need a receipt:

Proceed with payment

This amount will be preauthorized to initiate the charging session.

\$15.00

The actual amount for the consumed electricity will be charged at the end of the session.

Or pay with card

Card information

Cardholder name

Country or region

Credit card and pre-authorization

Once the EV charger is plugged into the vehicle, guests will enter their credit card.

Typically, a \$15 pre-authorization allows the session to begin.

To conclude the charging session, the guest will unplug the vehicle. Any remaining balance from the pre-authorization will be refunded.
